

Transparent Movie Recommendation System
 Weekly Report
 8 September 2015
 Neil Getty
 Mustafa Bilgic

Code changes this week:

Data Preprocessing

- Improved grouplens/imdb movie matches from 60% to 80%.
- Minimum keyword occurrence is now dynamic with best results ~45
- Average movie rating now included in training set (resulting in 0.08 decrease in MAE)

Predictive Models

- Added method for computing MAE with Lasso Regression model
- alpha values now passed in dynamically

Descriptive Statistics

- Added methods for plotting MAE/keyword/genre/rating frequency

General

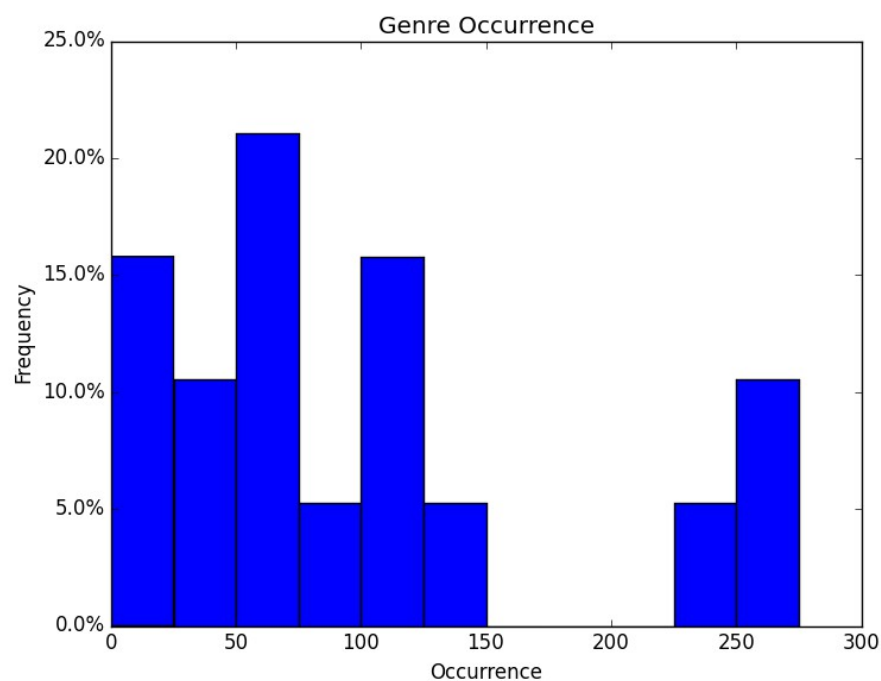

- Further organized methods into more specific classes
- Decreased time complexity

Below are charts and tables depicting data features:

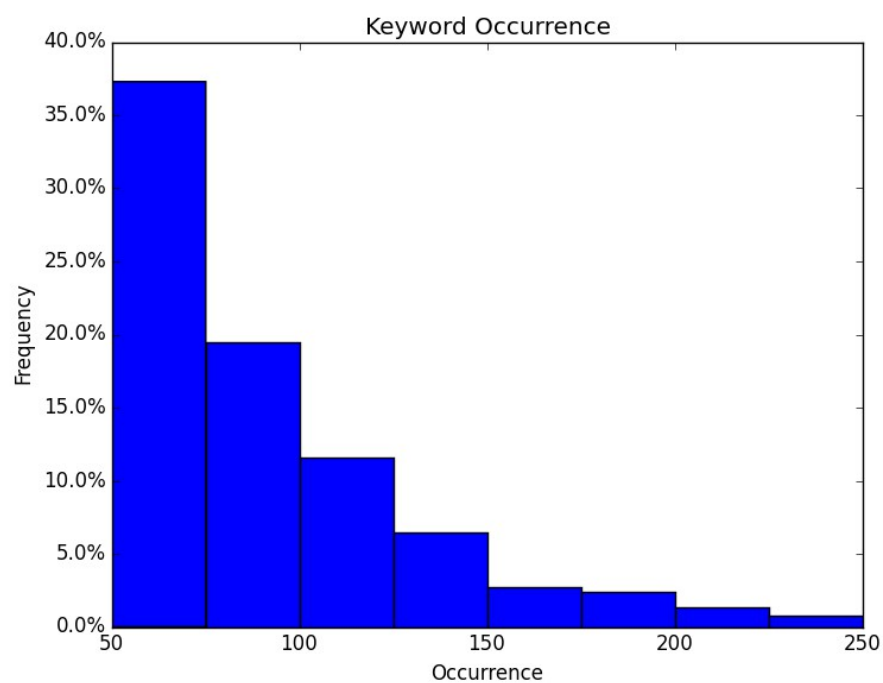

This chart depicts the ratings of **943** users.
 The rating frequency distribution is left-skewed.
 It is likely people tend to review movies they enjoy.

Drama	725
Comedy	505
Action	251
Thriller	251
Romance	247
Adventure	135
Children's	122
Crime	109
Sci-Fi	101
Horror	92
War	71
Mystery	61
Musical	56
Documentary	50
Animation	42
Western	27
Film-Noir	24
Fantasy	22
unknown	2

Drama and comedy are by far the most frequent genres of the **19**.

45	paris-france
45	suicide-attempt
45	greed
45	ship
45	newspaper-headline
45	basketball
45	product-placement
45	semiautomatic-pistol
45	champagne
45	1940s
270	friendship
274	title-spoken-by-character
276	cult-film
287	violence
292	love
296	based-on-novel
300	husband-wife-relationship
320	death
414	murder
480	independent-film

Right skewed keyword frequency distribution

Top **10** least/most frequent keywords of **370**

Below are charts and tables depicting model results:

MAE given alphas in range(1,20). Not plotted is $\alpha=.1$ which is off scale and yielded poor results.

Alpha	MAE
1	0.8793379821
2	0.8625366464
3	0.8435265508
4	0.8322018457
5	0.8265751307
6	0.8301550595
7	0.8139420623
8	0.8169360833
9	0.817121407
10	0.8106828301
11	0.8195926043
12	0.8191601729
13	0.8064503482
14	0.8150722365
15	0.8082146932
16	0.8111721182
17	0.8109946119
18	0.8150954161
19	0.8165423226

Alpha	MAE
0.01	0.8974925108
0.02	0.8392563215
0.03	0.8130726458
0.04	0.8074623706
0.05	0.7941261782
0.06	0.7965255467
0.07	0.7943692814
0.08	0.786841095
0.09	0.7889524035
0.1	0.784578596
0.11	0.7945739917
0.12	0.794822421
0.13	0.7962395991
0.14	0.7918176769
0.15	0.8104923694
0.16	0.794568814
0.17	0.8050769032
0.18	0.8078366815
0.19	0.8079446051

Alphas that minimize MAE: **15** for Ridge regression and **0.1** for Lasso

MAE frequency for Ridge and Lasso regression.
Average MAE approximately **0.80** for Ridge and **0.78** for Lasso
